Contify

Software Developer - (2+ Years)

- Gurugram

About Contify

Contify is a technology company that offers an AI-enabled Market and Competitive Intelligence (MCI) platform to help professionals make informed decisions.

Contify helps organizations such as Ericsson, EY, Wipro, Deloitte, L&T, BCG, MetLife, etc., track information on their competitors, customers, industries, and topics of interest. Contify delivers unique strategic updates by continuously monitoring over 500,000+ sources in real-time.

Contify is rapidly growing, with more than 200 people across two offices in India. Contify is the winner of Frost and Sullivan's Product Innovation Award for Market and Competitive Intelligence Platforms.

Job Description

➔ Code new features, fix reported bugs, enhance the product in any way possible
➔ Understand the existing code base, and monitor and maintain existing code
➔ Coordinate with the team lead and architect for new requirements
➔ Participate in design discussions and provide input on various feature requests and requirements
➔ Perform peer reviews of colleagues, help maintain high coding standards, learn and share wisdom on best practices
➔ Participate in managing the software release process

Requirements

● Engineering graduate (preferably computer science) with 2+ years of hands-on experience in coding and web development.

Contify

- Proven experience and in-depth knowledge in one or more technologies. Experience in Python or any other scripting language is a bonus.

- Passionate about programming. You are among those who have written multiple scripts for productivity or written proprietary libraries if you can't find something that fits the need.

- Participated in the full life cycle of a large project: design, implementation, testing, releasing and sustaining.

- Experience in unit testing and identifying good test cases.

- Experience in working with at least one database - Oracle, MySQL or PostgreSQL preferred. Experience with an ORM technology to map against a relational store is a bonus.

- Experimenting with lots of latest development libraries and tools.

- Must be able to show us projects/websites that you have created. Bonus points if you've created these projects/websites outside of your work (we love seeing proof of how much you love technology and coding).

Current tech stack

➢ Python and Django are our primary tools.
➢ PostgreSQL as our database.
➢ Apache Solr for search.
➢ AngularJS and jQuery for client-side magic.
➢ OS - Fedora Linux.
➢ We love trying out new things and are open to adopting new tools/frameworks if their practicality for the job at hand can be proved.

Note
Contify is a people-oriented company. Emotional intelligence, therefore, is a must. You enjoy working in a team environment, supporting your teammates in pursuit of

our common goals, and working with your colleagues to drive customer value. You strive to not only improve yourself but also those around you.
